COVER LETTER

I am excited to submit my application for the internship. With a Bachelor of Technology in Information Technology from the Indian Institute of Engineering Science and Technology, Shibpur, and hands-on experience as a Frontend Web Developer Intern at Swabhyaas, I am eager to bring my strong technical skills and passion for web development to your esteemed organization.

During my internship at Swabhyaas, I played a crucial role in developing an intent classification tool using Python and enhancing an AI interview platform's user interface with React and Tailwind CSS. This experience allowed me to deliver high-quality, user-friendly web applications under tight deadlines and collaborate effectively within a dynamic team.

My technical skills include proficiency in programming languages such as C, C++, Python, JavaScript, and TypeScript, and expertise in web development technologies like Next.js, React, Node.js, and RESTful APIs. Additionally, I am well-versed in database management with MongoDB and SQL and have a solid foundation in operating systems and tools, including Linux, Git, and GitHub.

A notable project I developed is "My Links Live" a link-in-bio tool utilizing Next.js, Tailwind CSS, TypeScript, Clerk for authentication, and Cloudflare R2 for seamless storage bucket integration and image uploads. This project showcases my ability to build robust, scalable web applications with modern frameworks and tools.

Furthermore, my role in developing the ICISS 2024 conference website from scratch, including logo and poster design, demonstrates my versatility and attention to detail. My commitment to continuous learning is evidenced by my certifications in Web Development Backend and JavaScript, as well as my success in HackerRank's React assessment.

I have also worked on various other projects, including the Indian Stock Market Data tool using FastAPI and Selenium, and the Convertfast media conversion tool with WebAssembly. These projects highlight my ability to implement REST APIs, handle web scraping, and work with advanced web technologies.

I am confident that my background and skills align well with the requirements of the role and that I can make a significant contribution to your team. Thank you for considering my application. I look forward to the opportunity to discuss how my skills and experiences align with the needs of your organization. Please feel free to contact me at your convenience.

Warm regards,

Kundan Kumar.
