EDUCATION

- Indian Institute of Engineering Science and Technology, Shibpur
Bachelor of Technology - Information Technology
7.50/10 (CGPA upto 4th Semester)
2021-2025*
- St. Jagatgyan Senior Sec. Public School, Ranchi
12th Standard (Science)
77%
2019-2021
- Manjula Sharma Memorial Academy, Koderma
10th Standard
92.6%
2019

TECHNICAL SKILLS

- Programming Languages : C, C++ (Data Structures and Algorithm), Python, JavaScript (ES6) and TypeScript
- Technologies & Frameworks : NextJs, HTML, CSS, ReactJs, NodeJs(with Express) and RESTful APIs
- Databases : MongoDB (with Mongoose) and SQL
- Data Structures and Algorithms (using C++)

EXPERIENCE

Frontend Web Developer

Swabhyaas

December 2023 - Present

Web Development, ICISS 2024

(An international conference organized by IEST, Shibpur)

July 2023 - Present

- Created the complete website from scratch (design to code) using React .
- Designed the logos & posters for the same.
- Website : <https://iciss2024.in> | Repository : <https://github.com/techlism/iciss-2024>

PROJECTS

ImageSage : A stock photo web-app

Technologies used : ReactJs, HTML, CSS, NodeJs, MongoDB and Auth0

- ImageSage allows users to search and download images (using Pixabay's API in backend).
- User can use log in and save their likes using Auth0 and MongoDB.
- Logged in user can mark their favourites and download history (stored using MongoDB).
- Deployed at <https://imagesage.netlify.app>

DealsDash

Technologies used: BrightData, NextJs, MongoDB and TypeScript

- DealsDash allows a user to track any Amazon product's price history.
- User add an email address will receive alerts if price drops (using NodeMailer).
- Price is tracked using a CRON JOB which periodically fetches prices from Amazon using BrightData's API & Cheerio (for extraction) and then stores in DataBase (MongoDB).
- Deployed at : <https://dealsdash.vercel.app> | Repository : <https://github.com/techlism/dealsdash>

Indian Stock Market Data

Technologies used: FastAPI with Python, Selenium, Docker

- Provides Rest API (JSON response) on different routes using FASTAPI.
- Primarily targets two main Indian market indices SENSEX and NIFTY (current implementation).
- Using selenium to scrape automatically both website's pages for latest data.
- GitHub : https://github.com/techlism/indian_stock_market_data

CERTIFICATIONS AND ACHIEVEMENTS

- Solved 320+ LeetCode Problems
- Web Development Backend Certification on Udemy
- JavaScript Complete Course on Udemy
- HackerRank's React Assessment

EXTRA CURRICULARS

- Video Editing (Premiere Pro) and Canva
